EXPERIENCE

PROJECT ENGINEER/PROJECT MANAGER
SOUTHEASTERN ENGINEERING, INC., MARIETTA, GA (Nov 2015 – present)

- Managing federally funded pedestrian improvement projects for the Transportation Enhancement Program at the GA Dept. of Transportation (GDOT).
- Keeping projects on track by guiding sponsors and their design consultants through the right-of-way, design, funding and construction processes and certifications.
- Daily documentation via database updates on the progress of all projects assigned to me in order to remain compliant with the Georgia open records act.
- Hosting monthly teleconferences for each project to keep consultants and sponsors communicating and to assist with state and federal requirements.
- Tasked to design small intersections, widening projects and pedestrian facilities for local communities in the state of Georgia.
- Adhering to design specifications set by the state and federal government, and the client project budgets for design.
- Reviewing preliminary and final roadway construction plans for GDOT as a quality control measure.
- Designing roadway and storm drainage layouts using the design software Microstation by Bentley to achieve optimal design.

SMALL BUSINESS OWNER
DESIGN OPTIONS, CANTON, GA (Jan 2014 – Mar 2019)

- Built and maintained WooCommerce, Shopify and Amazon Seller Central accounts to hold online store presence.
- Stayed current with market trends to determine optimal pricing of goods and services and to capitalize on emerging opportunities.
- Promoted business via social media to generate leads and maximize brand identity.
